*2D and 3D modeling including  
NURBS, Solids, Surfaces & Meshes*

# VisualCAD

VisualCAD 2018 is a completely free modeling software from MecSoft Corporation. Sporting a modern user interface, it makes creation of 2D and 3D curves as well as 3D surfaces, solids and meshes easy and efficient. It includes numerous file importing capabilities such as DXF/DWG, IGES, STEP and other file formats making it an ideal companion product to your mainline CAD system.

With its renowned ease of use, a complete geometry creation and manipulation tool-set and fast shaded graphics and rendering, VisualCAD 2018 is a perfect system for first time CAD users and/or educational users. VisualCAD also serves as the platform for hosting plug-ins such as the VisualCAM and Visual3DPRINT plug-ins from MecSoft Corporation.
