IronCAD and MecSoft Announce New Software Bundle FOR RELEASE: OCTOBER 23, 2002 Inovate and VisualMill a Winning Combination for CAD/CAM Users

ATLANTA, GA., October 23, 2002—IronCAD, LLC, the innovative and collaboration design Solutions Company and MecSoft Corporation are proud to announce the availability of a new software bundle that delivers a new standard in easy to use CAD/CAM software "InovateCAM". This powerful combination of Inovate 5.2 and VisualMill 4.0 brings together award winning 3D design software that does not require you to be a CAD expert to use it and Industrial strength CAM at a price point that everyone can afford.

Greg Haywood of MecSoft states: "We are extremely happy with our new relationship with IronCAD and our combined ability to offer such value to the marketplace. This InovateCAM package will transform the way people think about CAD/CAM. The combination of Inovate's award winning 3D CAD capabilities as a front-end and the powerful features in VisualMill 4.0 will provide outstanding price performance value to the customer. InovateCAM offers ninety percent of the functionality of older legacy systems for the sales tax you would pay on their software. MecSoft's philosophy is simple – "create a great product at a great price and the customers will come".

Shaun Murphy, VP of Marketing at IronCAD, states, "We have found that manufacturing engineers are more concerned about making the parts, they have no time for learning a complex CAD system. Inovate with its award winning ease of use is the answer; it lets them get the data in, make the changes they need to and get the data back out into CAM with the least amount of fuss. Some may think that is a bold statement, to those people I say download Inovate and try it for yourself"

This software bundle is available through your local authorized IronCAD or VisualMill reseller or directly from either company. Pricing for the bundle has been set at just \$1,790. For users who already have Inovate there is a special promotion available to purchase VisualMill 4.0 for just \$995. For users who already have VisualMill, Inovate can be purchased for the promotion price of \$895.

About IronCAD, LLC

Based in Atlanta, GA, IronCAD, LLC is a leading provider of innovative design solutions that deliver the highest levels of customer satisfaction and productivity. Its flagship product family, InnovationSuite, is a fully integrated design and information management environment that encourages creativity, productivity and teamwork with award winning 3D design and collaboration solutions managed through a Web-based Engineering Data Management (EDM) system. Components of InnovationSuite are used by customers throughout the world, including, Cisco Systems, Cummins Engine, Electrolux, Ericsson, John Deere, Eastman Kodak, Eaton Corporation, Fleetwood Enterprises, Greenheck, Hewlett-Packard, Honeywell, Intel, Lucent, Raytheon, Robert Bosch, Skyline Exhibits, Visteon, Volvo, and Xerox.
