MecSoft releases significant updates to products

Irvine, CA – May 23, 2007: MecSoft Corporation, manufacturers of the industry leading manufacturing software, is pleased to announce the release of a significant update to VisualMill 5.0. This service pack 11 release adds significant new capabilities and is available free for customers.

MecSoft with this release, once again demonstrates its commitment to its customers by not only continually improving its product line but also making sure that these improvements are available to customers with little or no price increases.

This upgrade for VisualMill 5.0 includes the following new features:

- Direct import of Rhinoceros 4.0 files
- 5 Axis indexed post support
- Upgraded Post-Processor Generator
- New STEP translator
- Updates to DXF/DWG, IGES, & VDA/FS translators
- Updated graphics display
- File Preview of VisualMill Part files
- New project file scripting functionality
- Improved V-carving
- Coolant code output improvements

MecSoft is also pleased to announce a service pack update for VisualTurn 1.0.

Both upgrades are available for immediate download from the Service Pack download area of MecSoft's web-site.

For more information, please call (949) 654-8163 or MecSoft's website at <http://www.mecsoft.com>.
