Press Release

MecSoft Announces VisualXPORt for SolidWorks

Irvine, CA, March 1, 2011: [MecSoft Corporation](http://www.mecsoft.com), a global leader in Computer Aided Manufacturing (CAM) software, announced today the release of VisualXPORt for SolidWorks.

VisualXPORt for SolidWorks is a direct plug-in for SolidWorks, letting users export their parts in VisualMILL formatted files (.vcp). The solution provides an enhanced workflow for companies that design in SolidWorks and use VisualMILL in their manufacturing process.

“As a Gold Certified CAM developer for SolidWorks, MecSoft is very familiar with the unique needs of SolidWorks users,” stated Joe Anand, President and CEO of MecSoft. “VisualXPORt for SolidWorks was created as a direct result of the feedback we received from our VisualMILL customers. They needed enhanced export capabilities in SolidWorks beyond the STL, IGES and STEP format while not having to give up using our standalone VisualMILL CAM software.”

With VisualXPORt for SolidWorks you can export: 2D & 3D Sketches (curves), Solids with combined faces, Solids with separate faces and individual surfaces. It is compatible with SolidWorks versions 2008 to 2011, 32-bit and 64-bit versions. To learn more about VisualXPORt for SolidWorks, please visit <http://www.visualxport.com>.

About MecSoft Corporation

Headquartered in Irvine, California, MecSoft Corporation is a worldwide leader in providing Computer Aided Manufacturing (CAM) software products for the small to mid-market segments. These products include VisualMILL®, VisualMILL for SolidWorks®, RhinoCAM™, Alibre CAM® and VisualTURN®. Products that deliver powerful, affordable and easy to use solutions to users in the rapid manufacturing, woodworking, mold making, aerospace, automotive, education and tool & die industries.
