Mecsoft to Use MachineWorks Technology in VisualMill

SHEFFIELD, England, November 4, 2002 - LightWork Design, the world's leading supplier of quality advanced computer graphics software for rendering, simulation and verification solutions, today announced their partnership with MecSoft Corporation of Irvine, California, USA. Through the partnership, version 4.0 of MecSoft's VisualMill CAM solution features MachineWorks technology to give its users a truly 1st class True Solid simulation of their toolpath.

Greg Haywood, MecSoft's VP of Sales and Marketing, said on the partnership, "VisualMill v4.0 is a major new release for MecSoft. By integrating MachineWorks technology, we are sending a clear message to the market that we are not prepared to sacrifice quality in the drive to offer value to our customers."

MachineWorks Division General Manager, Dr. David Manley commented, "We recognize the technical advances VisualMill has made and how much the company has developed in such a short time. The partnership will enable a whole new set of users to benefit from MachineWorks' efficiency-boosting functionality."

About MachineWorks

MachineWorks is LightWork Design's leading CNC simulation and verification toolkit for manufacturing software developers. It combines unparalleled speed and accuracy with industrial strength robustness and is integrated into the majority of the world's CAM packages.

By integrating MachineWorks directly into their applications, developers shorten their R&D cycle, and get to market faster with a better solution - one that their customers can subsequently rely on to increase productivity and guarantee the quality of their manufacturing output.

About LightWork Design

LightWork Design is the world's leading supplier of quality, advanced computer graphics for rendering, simulation, and visualization solutions within CAD, CAM & AEC markets. Established in 1989, LightWork Design continues to invest in research and development to provide its customer base with innovative and market-focused technology. The company's products are used in more than 150 software applications worldwide and by over one million 3D software users.

LightWork Design offers MachineWorks for CNC toolpath simulation and verification and LightWorks for photo-realistic rendering and lighting simulation. www.lightworkdesign.com.
