## **MecSoft Corporation launches VisualMill Basic for \$550.00**

Irvine, CA.—March 10, 2002 -- MecSoft Corporation, has launched VisualMill Basic. For a limited time this product will be offered at 45% off of list price. MecSoft will also be bundling this product with Robert McNeel and Associates Rhino3D, to offer "RhinoCAM Basic" (VisualMill Basic 4.0 and Rhino3D) for \$995.00.00. This offer will be restricted to English language products only.

Greg Haywood of MecSoft states: "This new price point for an industrial strength milling package is a paradigm shift in the CAM industry. Before VisualMill the choices for low cost CAM were slim and more often than not, you got what you paid for. VisualMill Basic and RhinoCAM Basic are changing the rules of the game. VisualMill Basic 4.0 offers windows-based 2½ axis, 3 axis, solids, surface, and STL milling. It also includes the VisualMill 4.0 CAM engine, DXF, IGES and other CAD imports, as well as a configurable post-processor. This product can be fully upgraded at any time to our flagship product VisualMill 4.0. Customers of VisualMill Basic 4.0 receive full credit towards VisualMill 4.0. We believe the world is ready for mainstream CAM, VisualMill is here!"

This package is available through your local authorized VisualMill dealer. To find your local reseller or learn more about VisualMill visit us at [www.MecSoft.com](http://www.MecSoft.com)
