MecSoft unveils "5 Axis under 5K"

Irvine, CA.— April 30, 2003 -- MecSoft Corporation, developer of the industry leading VisualMill CAM product announces the release of a 5 axis post processing solution. This solution is the result of a collaborative effort between MecSoft and Machining Solution Software Incorporated, MecSoft's master distributor in the state of California. VisualMill 5.0 with its new 5 axis post-processing solution ushers in ground breaking price performance value by offering 5 Axis machining under 5K (US\$5000).

Joe Anand, President of MecSoft states, "VisualMill 5.0 together with our 5-axis post-processing solution solidifies MecSoft's position in the CAM market place as a leading edge solution provider. We are excited to offer this solution to users who were previously unable to take advantage of 5 axis functionality due to the high costs and complexity involved. Our 5 axis solution shatters these barriers by providing ease of use to reduce complexity, advanced functionality for sophisticated requirements and affordability for the budget conscious."

Key features of the 5 axis Post Processor solution for VisualMill 5.0 include:

- Support for all common 5 axis machine tool and control configurations
- Utilizes existing VisualMill 5.0 post processor files
- Customizable by the customer or dealer for specific output format requirements.
- Push button simple
- Complete and in-depth support from Machining Solution Software Inc. and MecSoft
- Scalable – currently supports indexing, continuous motion support for future releases
- Built for professionals by professionals
