Press Release

MecSoft Launches Social Networking Website for FreeMILL Users

Irvine, CA; April 27, 2011: [MecSoft Corporation](http://www.mecsoft.com), a global leader in Computer Aided Manufacturing (CAM) software, announced today the launch of an online community for FreeMILL users.

Designed as a social networking website, www.freecadcam.com was created to allow the FreeMILL community a place to connect with other users. "FreeMILL users have such varied backgrounds and stories that we wanted to create a community where they could show off their projects, ask questions and connect with each other. This site would also serve as a tool to help FreeMILL users communicate with us at MecSoft, so we can better understand their needs." stated Joe Anand, President and CEO of MecSoft.

Offered as a free, fully functional CAM software program, FreeMILL allows users to import 3D models in STL, Rhino[®], VisualMILL[®], VRML and Raw Triangle formats, generate toolpaths and post out G-code programs to their CNC equipment. A Windows application, FreeMILL comes with over 50 post processors and offers full cut material simulation of toolpaths.

About MecSoft Corporation

Headquartered in Irvine, California, MecSoft Corporation is a worldwide leader in providing Computer Aided Manufacturing (CAM) software products for the small to mid-market segments. These products include VisualMILL[®], VisualMILL for SolidWorks[®], RhinoCAM[™], Alibre CAM[®] and VisualTURN[®]. Products that deliver powerful, affordable and easy to use solutions to users in the rapid manufacturing, woodworking, mold making, aerospace, automotive, education and tool & die industries.
