VisualMILL for SolidWorks®

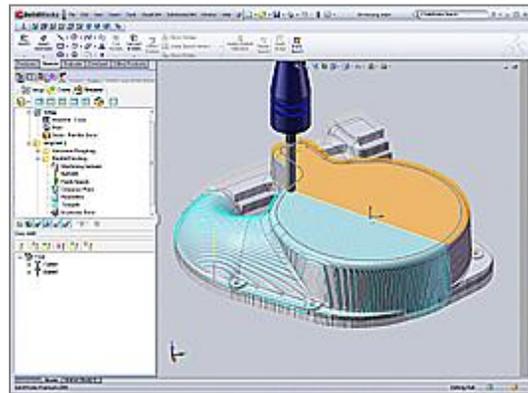

Press Release

VisualMILL for SolidWorks achieves Gold Partner status from DS SolidWorks Corp.

Irvine, CA, May 12, 2010: [MecSoft Corporation](http://www.mecsoft.com), today announced that its [VisualMILL for SolidWorks®](http://www.mecsoft.com/visualmill), an affordable, completely integrated CAM software solution for SolidWorks® 2010 3D CAD software has been awarded Certified Gold status by DS SolidWorks Corp.

As a SolidWorks Certified Gold Partner product, [VisualMILL for SolidWorks](http://www.mecsoft.com/visualmill)

marries the power and functionality of SolidWorks's legendary parametric design capabilities with the production tested CAM capabilities of VisualMILL. Users can utilize seamless single-window integration, complete with full model associativity, to generate effective and high quality 2-1/2 axis, 3 axis, 4 axis, and 5 axis indexed tool paths that can be used in a wide range of applications; ranging from mold making , wood working, prototyping, industrial production, jewelry and dental markets. It can truly stake a claim as the most intuitive, easy to use and affordable manufacturing solution integrated in SolidWorks. With product prices starting at US \$999, [VisualMILL for SolidWorks](http://www.mecsoft.com/visualmill) also breaks the affordability barrier by offering production hardened CAM software that costs less than the price of their original SolidWorks investment.

With over a decade of production testing, and with thousands of users around the world utilizing VisualMILL technology in their manufacturing process, MecSoft has joined the select products that have received Certified Gold status.

“This Gold Certification recognizes the highest level of integration of [VisualMILL for SolidWorks](http://www.mecsoft.com/visualmill) and Solidworks 3D CAD software. This integration can not only shave precious time off of the entire design to manufacturing cycle but also increase productivity and quality across the board. This directly translates to reduced cost, higher quality and quicker time to market for our customers, all of which are vital ingredients for success in today’s competitive market place.” says Joe Anand, President of MecSoft.

“Integration between CAD and CAM can shave precious time off of the product development process and increase productivity,” said Nick Iwaskow, DS SolidWorks Corp., Manager, Alliances. “Integrating [VisualMILL for SolidWorks](#) directly within the SolidWorks environment not only helps designers and engineers improve designs but also enables them to manufacture and deliver these designed products to their customers more efficiently.”

About MecSoft Corporation

[MecSoft Corporation](#), a California based company, is a leading developer and provider of affordable CAD/CAM software solutions. Their products such VisualMILL, VisualMILL For SolidWorks, RhinoCAM, AlibreCAM are used for manufacturing parts in a wide variety of industries including aerospace, automotive, education, general machining and mold & die. For further information about MecSoft Corporation or any of their products, please call 949-654-8163, visit www.visualmillforsolidworks.com or www.mecsoft.com or email sales@mecsoft.com

About Dassault Systèmes SolidWorks Corp.

[Dassault Systèmes SolidWorks Corp.](#), a [Dassault Systèmes](#) S.A. subsidiary, is a world leader in 3D solutions that help millions of engineers and designers succeed through innovation. Our products deliver an intuitive experience in product design, simulation, publishing, data management, and environmental impact assessment. For the latest news, information, or an online demonstration, visit our Web site (www.solidworks.com) or call 1-800-693-9000 (outside of North America, call +1-978-371-5000).
